Imad ud din khattak

AI Engineer

+92-345-9198769 | imad.works100@gmail.com | LinkedIn | GitHub | Portfolio

Summary

AI/ML Engineer with **1.5 years of professional experience** building and deploying machine learning, deep learning, and LLM-powered applications. Skilled in developing AI solutions using **Python, LangChain, LangGraph, and the OpenAI Agents SDK**, with expertise in **RAG systems, agentic AI workflows, model development, and AI automation**. Experienced in integrating AI/ML solutions with **REST APIs, databases, and cloud infrastructure** to build scalable, reliable, and production-ready applications.

Experience

AI/ML Engineer Sep 2025 – Present
K2X Tech *Peshawar, PK*
- Built ETL pipelines integrating REST APIs, transforming data, and storing it in PostgreSQL.
- Developed LLM-powered document autofill and information extraction systems using FastAPI, Mistral.
- Built an audio advertisement detection system using audio fingerprinting and timestamp generation.
- Developed Python backend services and AI automation workflows to reduce manual effort.
- Managed PostgreSQL databases and optimized queries and schemas.
- Deployed applications with Docker and AWS EC2 using Git and AWS CodeCommit.
- **Technologies:** Python, FastAPI, PostgreSQL, LangChain, Ollama, Docker, AWS, Git, REST APIs

AI/ML Intern Jul 2025 – Aug 2025
Resolve (NSTP) *Islamabad, PK*
- Built SQL-based Question Answering systems using LLMs for structured databases.
- Designed LangChain-based multi-step SQL agents to automate data retrieval and query generation.
- **Technologies:** Python, LangChain, MySQL, Flask.

AI/ML Intern Sep 2024 – Oct 2024
Bave Technologies *Peshawar, KP*
- Built robust web scraping pipelines using Selenium, Requests, and BeautifulSoup.
- Automated data collection workflows and stored cleaned data into CSV files.

Projects

AI Call Agent for Shopping Mall Information Retrieval (Final Year Project) | GitHub
- Built a voice-based AI agent for shopping mall inquiries using **OpenAI**, **LangChain**, and Python.
- Implemented agentic workflows to interpret natural-language queries and dynamically query SQL databases.
- Integrated OpenAI Whisper, TTS, and VAD for real-time, hands-free voice conversations.
- Connected the agent to a SQL database and built the backend with **FastAPI** and modular API integrations.

Face Detection & Automated Email Responder | GitHub
- Built a real-time face recognition system using **ResNet18** and **PyTorch**.
- Used **MTCNN** and OpenCV for face detection, cropping, and real-time face tracking.
- Trained the model with data augmentation to improve recognition accuracy.
- Automated email notifications based on the detected person's identity.

AI Job Application & Job Aggregation System | GitHub | Live
- Built an AI-powered job aggregation platform collecting listings from LinkedIn, Glassdoor, Indeed, and other sources.
- Automated job extraction, cleaning, standardization, and deduplication using Python-based data pipelines.
- Processed job titles, companies, locations, skills, and requirements for efficient search and matching.

Education

Institute of Management Sciences Peshawar, KP
Bachelor of Data Science — CGPA: 3.10 *Sep 2021 – Jun 2025*

Technical Skills

Agentic AI:	OpenAI Agents SDK, LangChain, LangGraph, CrewAI, n8n, Prompt Engineering
AI/ML & Deep Learning:	GPT-4, Hugging Face, Ollama, PyTorch, Scikit-learn, Faster-Whisper
Programming & Data:	Python, SQL, Pandas, NumPy
Web & Automation:	FastAPI, Flask, Selenium, Playwright, BeautifulSoup, REST APIs
Databases & DevOps:	MySQL, PostgreSQL, Docker, Git
AI Development Tools:	Cursor, Antigravity, vscode

Certificates

IBM AI Engineering 2024 – 2025
Coursera

Applied Data Science Lab 2023 – 2024
WorldQuant University

The Complete Python Developer 2022 – 2023
Udemy
