Imad ud din Khattak

AI Engineer | LLMs & Agentic AI | RAG & ML Systems

Peshawar, Pakistan | | +92 345 9198769 | imad.works100@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

AI/ML Engineer specializing in building and deploying LLM-powered systems, RAG pipelines, SQL agents, and machine learning models. Experienced in PostgreSQL database design, Docker, and AWS deployment (EC2, CodeCommit). Also an AI Instructor delivering the Huawei HCCDA-AI curriculum. Skilled in Python, LangChain, LangGraph, FastAPI, and PyTorch.

PROFESSIONAL EXPERIENCE

AI Engineer — Feb 2026 – Present

K2X Tech | Peshawar, Pakistan

- Design and deploy LLM-powered systems for real-world business applications, from prototype to production.
- Built SQL-based AI agents that convert natural-language questions into optimised database queries over PostgreSQL.
- Developed RAG pipelines using embedding models and vector databases (FAISS, Pinecone) for grounded, context-aware responses.
- Integrated local and cloud LLMs (Ollama, Groq API) into scalable services, and built voice-enabled assistants with speech-to-text and text-to-speech.
- Orchestrated multi-step AI workflows with LangChain and LangGraph; improved response quality through prompt engineering, evaluation, and logging.
- Collaborate with cross-functional teams to ship and maintain AI solutions in production.
- **Technologies:** Python, FastAPI, PostgreSQL, LangChain, LangGraph, Ollama, Docker, AWS, Git

AI Instructor (Huawei HCCDA-AI) — Aug 2026 – Present

Corvit | Peshawar, Pakistan

- Teach the Huawei HCCDA-AI certification course end to end: Python, data preprocessing (Pandas, NumPy), machine learning, and deep learning.
- Cover core ML algorithms, gradient descent, and neural network training and evaluation using Scikit-learn and PyTorch.
- Teach generative AI topics: LLM APIs, RAG architectures, Hugging Face pipelines, diffusion models, prompt chaining, and agentic AI.
- Design exercises, assessments, and practical assignments to measure learner progress.

AI/ML Intern — Sep 2025 – Feb 2026

K2X Tech | Peshawar, Pakistan

- **GeniHunt:** Built an automated data pipeline that ingests data from external APIs, parses and cleans XML responses, and loads structured records into PostgreSQL; deployed on AWS EC2 with scheduled daily cron execution.
- **EChecker:** Developed an LLM-powered document extraction and autofill service (FastAPI, Mistral) that populates SME assessment forms from uploaded documents.
- **Ad Detection System:** Built an audio advertisement detection system using audio fingerprinting with timestamp generation.
- Managed PostgreSQL databases, including schema design and query optimisation.
- Containerised applications with Docker and deployed to AWS EC2 using Git and AWS CodeCommit.

AI Engineer — Jun 2025 – Aug 2025

National Science & Technology Park | Islamabad, Pakistan

- Built a RAG-powered SQL chatbot that converts natural language to SQL, executes queries, and returns answers, using both a chain-based Q&A system and a LangGraph SQL agent for multi-step reasoning.
- Integrated open-source LLMs (LLaMA, Mistral via Ollama) with PostgreSQL and MySQL.
- Secured database access with read-only permissions, query validation, and SQL injection prevention.
- Contributed to a speaker diarization and transcription proof of concept for real-time audio processing.
- Documented architecture, workflows, and deployment steps for reproducibility.
- **Technologies:** Python, Ollama, LangGraph, PostgreSQL, MySQL, Flask, Streamlit, Whisper

AI/ML Engineer **Oct 2024 – Jan 2024**
Bave Holdings LLC | Peshawar, Pakistan

- Built web scraping and API ingestion pipelines (Selenium, BeautifulSoup, Requests) to collect structured data from dynamic websites, using proxy rotation to sustain high success rates.
- Cleaned, parsed, and stored extracted data in structured formats, and connected it to LLMs for intelligent parsing and analysis.
- Automated data collection workflows, reducing manual effort.

AI/ML Engineer **Jun 2023 – Jul 2023**
FEMCodes | Peshawar, Pakistan

- Built a machine learning Intrusion Detection System that classifies network connections as attack or normal traffic.
- Completed the full ML workflow: preprocessing, feature engineering, model training, evaluation, and validation.

KEY PROJECTS

AI Call Agent for Shopping Mall Information Retrieval (Final Year Project) **GitHub**
OpenAI | LangChain | Whisper | FastAPI | SQL

- Built a voice-based AI agent that interprets natural-language queries and dynamically queries a SQL database.
- Integrated OpenAI Whisper, TTS, and VAD for real-time, hands-free voice conversations; backend built with FastAPI.

Face Detection & Automated Email Responder **GitHub**
PyTorch | ResNet18 | MTCNN | OpenCV

- Trained a ResNet18 face recognition model in PyTorch with data augmentation to improve accuracy.
- Used MTCNN and OpenCV for real-time detection and tracking, and automated email notifications by identity.

AI Job Aggregation System **GitHub | Live**
Python | Data Pipelines | Web Scraping

- Built a platform aggregating listings from LinkedIn, Glassdoor, Indeed, and other sources, with automated extraction, cleaning, standardisation, and deduplication.

TECHNICAL SKILLS

Generative AI:	LLM APIs, RAG, Vector Databases (FAISS, Pinecone), Hugging Face, Diffusion Models, Prompt Engineering
Agentic AI:	LangChain, LangGraph, OpenAI Agents SDK, CrewAI, n8n, Make
ML & Deep Learning:	PyTorch, Scikit-learn, Model Training & Evaluation, Ollama, Whisper
Programming & Data:	Python, SQL, Pandas, NumPy
Backend & Automation:	FastAPI, Flask, REST APIs, Selenium, Playwright, BeautifulSoup
Databases & Cloud:	PostgreSQL, MySQL, Docker, AWS (EC2, CodeCommit), Git

CERTIFICATIONS

- Generative AI Engineering with LLMs Specialization
- AI Engineer Agentic Track: The Complete Agent & MCP Course
- IBM AI Engineering – Coursera 2024 – 2025
- Applied Data Science Lab – WorldQuant University 2023 – 2024

EDUCATION

Bachelor of Data Science **Sep 2021 – Jul 2025**
Institute of Management Sciences, Peshawar **GPA: 3.01**
